

# Introducing the Shellback

## The All-Weather Backpack for *Fearless* Bike to Work Commuters

Crease-free Suit Carried Inside!

Designed exclusively for Bike to Work commuters, the Shellback carries workday attire crease-free, alternating easily between a professional wardrobe (suit, uniform, etc.) or casual attire. The Air Max™ external frame creates airflow between the pack and the rider, significantly reducing perspiration. The Shellback was thoughtfully designed for *all* one-day work requirements and utilizes highly-reflective glass-bead fabric for bright luminescence in low-light conditions. The Shellback has more bike-friendly features than we can list!

Shellback enhances the riding experience with the Bike to Work SOP:

- **Simplifies** the packing and departure process with Closet-to-Backpack hangers and crease-free garment storage
- **Organizes** the packing system so the rider doesn't forget critical workplace items
- **Protects** the rider with high-vis reflective fabric and piping as well as contents inside with waterproof zippers and rain cover
